

### Headlines about us

Pace Insights is a world-class sports engineering consultancy.

We build software analytics tools, instrumentation and training equipment that is used by 30+ high-performance sports to enhance their performance.

26 of our customers were in Rio this summer. 25 got Gold medals.

- We're about the pursuit of excellence.
- We're about winning.
- We're small.
- We're friendly.
- We're obsessive.
- We're free to choose our technology - including building our own.
- We're asked to do things no-ones ever done before - that's hard sometimes.
- We're changing a global industry.
- We're just at the beginning.
- We need your talent to grow.

### Desired Skills and Experience

We're ideally looking for someone to take on the role of Full Stack Developer, to own and lead application development and enhance functional applications. This requires a blend of the following skills:

- Experience building web apps in Python (Django) or PHP.
- Data visualisation / analytics / dashboard development experience.
- HTML, CSS & Javascript development skills.
- Experience of deploying and maintaining websites on cloud platforms with Linux and PostgreSQL.
- Experience of Agile development practices such as Test Driven Development and User Stories
- A real appreciation of clean, well-tested, well-documented code.
- Familiarity with version control systems such as Git or Subversion.

### Bonus

- Experience with Python or R for data analytics, predictive modelling.
- Excel (VBA), Tableau experience.
- Data acquisition / telemetry systems knowledge.
- Mobile development experience.

We will however, also consider someone with excellent front or backend skills who's ready and prepared to step into leading application development.

### The deal

Apart from a great bonus package and generous holiday allowance, you will be encouraged to:

- Work between home and our midlands based office – from within the UK (ie Brighton - London - Oxford - Birmingham - Manchester/Leeds/Sheffield)
- Take a step towards client product management so you get kudos for your projects
- Attend a variety of events to network and enhance your professional development

## Software Engineer

- Balance working on our research or personally directed projects

### **Next Steps**

If you have made up your mind to make an application please send your CV and a short covering letter to [jobs@paceinsights.com](mailto:jobs@paceinsights.com) outlining the value you can bring to Pace Insights in the first 12 months.
